

Kraft sandwich box from WK Thomas

W K Thomas has launched a 100% biodegradable leak-proof kraft salad box.

The stock item boxes are available in two sizes and can be fully printed, with a minimum print run of 25,000 per size.

They are made from 400 micron recycled kraft board with a liquid and grease resistant biodegradable dispersion coating to contain any salad dressing and a PLA (Polyactic acid) window

patch to maximise product visibility.

The new salad boxes are part of the “Green Collection”, which now consists of around 80 products, including recyclable, compostable and bio-degradable items.
